LOGAN SQUARE: A Place to Stay, a Place to Grow

4. Create a Greenway on the Bloomingdale Rail Line

The raised Bloomingdale rail corridor, owned by Canadian Pacific Railway and unused for several years, presents an opportunity for the creation of an elevated linear park that includes a trail and passive areas. In addition to providing a new transportation route that could connect to existing bike lanes to the north, south and east, the greenway would afford recreational opportunities and improved aesthetics for area residents. Access points, approximately every six to nine blocks, along with a passive river edge on its eastern end, would provide additional opportunities for greenspace creation.
