Ahmed ABDuRRaHeeM

Urban Planner | PMI® Member | Saudi Council of Engineers
Riyadh

Summary

- I am inspired by Mecca Strategy for development that says "Building Human and Developing the Place", this strategy also followed in Urban Design Protocols and Sustainability Pillars.
- Through the period of my work in Mecca and my participation in some projects that are developed in Mecca and its Suburbs, I was inspired by numerous ideas, concepts, and philosophies that contribute to achieving sustainability and strengthens the relationship between people and their place.
- From my professional experience I found that prior to developing the land we need first to empower people and mobilize communities as a key to achieve the comprehensive development; the messenger of Allah peace be upon him said: "Allah send me just for complete the noble deeds of morals.". Therefore, I am equally interested in capacity development through training courses and lectures. I work hard to build a career that aims to help the society and to have the professional capability to "Building Human and Developing the Place".

Experience

Kattan for Engineering Consultancy
Urban Planning Specialist
June 2020 - Present (3 months)
Riyadh, Saudi Arabia
