

Narrative Resumé: Norman R. Tyler, Ph.D., AICP

Overview

Dr. Norman Tyler in a distinguished career spanning five decades has focused on community development and preservation planning. He has brought a practitioner-based approach to his role as a planning educator, serving as mentor for two generations of planning students. The following information highlights the diversity of his involvements and describes an exemplary career of service to the profession.

Current position

Professor and Graduate Program Adviser; served as director of the program for 17 years
Eastern Michigan University Urban and Regional Planning Program
Phone: 734 761-5549; Fax: 734 487-6979; email: ntyler@emich.edu
Web page: tylertopics.com

Education

Ph.D., Urban and Regional Planning
Michigan State University, 1998

Dissertation was a continuation and expansion of research on downtown revitalization efforts from previous doctoral degree. The number of cities studied was expanded, new elements incorporated, and a time-series analysis compared responses from earlier research with responses from this survey.

Doctor of Architecture
The University of Michigan, 1987

Dissertation research focused on downtown revitalization efforts in eight small cities in Michigan. An extensive survey of downtown owners and merchants provided data for creating a downtown health perception index, which was used to evaluate the success of various revitalization programs and strategies.

Bachelor of Architecture
The University of Michigan, 1970

Capstone project: An elevated city proposal for Detroit's New Center area.

Professional experience

Norm Tyler's career spans three distinct phases: For the past 21 years he has been a full-time planning educator and community activist. Previously he was a planning and architect practitioner and consultant. Initially he served as a community advocate (Baltimore, VISTA volunteer) and rural development specialist (Sierra Leone, West Africa, Peace Corps Volunteer and trainer).

1990–current: Faculty, Urban and Regional Planning Program, Eastern Michigan University; Director of the Urban and Regional Planning Program from 1992 to 2009.
Currently teaching courses in Urban and Regional Planning Program

1987–1989: Adjunct Instructor, Eastern Michigan University.
Taught Community Development and Downtown Revitalization course

1983–1990: Principal, Norman Tyler, Architect/Planner, Ann Arbor, Michigan
Projects in planning, architecture, and historic surveys

1983–1986: Graduate Assistant Instructor, Taubman School of Architecture and Urban Planning, The University of Michigan
Taught Preservation Studio course

*Undergraduate student project:
Site Planning Studio*

Consultant for Main Street Program study for downtown Uniontown, Pennsylvania

1979–1981: Adjunct, Pennsylvania State University, Fayette campus
Taught architecture course

1974–1983: Principal, Tyler and Tyler, Architects/Planners, Mill Run, Pennsylvania.
Major projects included planner for new town, consultant to Redevelopment Authority, and consultant for Main Street Program

1972–1973: Trainer and recruiter for Peace Corps and VISTA programs.

1970–1972: Neighborhood Design Center, Baltimore, Maryland.
Staff for agency coordinating volunteer planners and architects

1964–1966: Peace Corps Volunteer, Sierra Leone, West Africa.
Rural development program

Professor of Urban and Regional Planning: Norman Tyler is an award-winning member of the faculty of the Urban and Regional Planning Program at Eastern Michigan University (EMU). As director of its Urban and Regional Planning Program, he has carried much of the responsibility for the continued success of its two planning programs (undergraduate and graduate) and overseen their significant growth.

*"I am impressed with his social consciousness and ethical standards. These are displayed on a daily basis in the classroom, at the university, and during professional meetings with public officials. He lives by the AICP Code of Ethics and promotes this code among students and colleagues at every opportunity."
(Robert M. Ward, Professor Emeritus, Urban and Regional Planning Program, Eastern Michigan University)*

Professionals Advisory Board for EMU Planning Program

Director of Urban and Regional Planning Program: For 17 years, Dr. Tyler was director of the Urban and Regional Planning Programs at EMU. He had primary responsibility for the initial accreditation of its undergraduate Urban and Regional Planning Program, lead searches for four new faculty, served as advisor for the undergraduate Planning Program and more recently for the graduate Planning Program. His success also is measured by the success of his students. Leslie Kettren AICP served on the National Board of the APA; as a student, Michelle Aniol AICP was honored as Student of the Year by the APA. Andrea Brown AICP currently serves as the Executive Director of the Michigan Association of Planning. Andrew Armbruster is completing his Masters in Urban Planning degree at Tongji University in Shanghai and has worked as a planner on a number of Chinese new towns.

Other program and university responsibilities: Dr. Tyler continues to serve in a number of capacities for the EMU Planning Program.

Representative to the university's Undergraduate Research Symposium.

Chair of search committee for three faculty searches; committee member for four other searches.

Coordinator of the Planning Program's Professionals Advisory Board.

Webmaster for the Planning Program's web site (<http://planning.emich.edu>).

Advisor for the program's student club, Planning Awareness Club of Eastern (PLACE).

Advisor for the Student Mentoring Program.

Editor and writer for the Planning Program's journal of student/faculty articles, and its newsletter.

Faculty coordinator for Annual Golf Outing program fund-raiser and establishment of the first student-run endowed scholarship fund at EMU, with an endowment of \$35,000.

Coordinated "World Town Planning Day" for Michigan planning students.

Other committee work, including Instruction Committee, College Advisory Council, Graduate Council, and advisory board for Faculty Center for Instructional Effectiveness.

Faculty Advisor for Planning Awareness Club of Eastern (PLACE)

Webmaster for EMU Urban and Regional Planning Program web site

Innovative Teaching Award, International Conference on College Teaching, Learning, and Technology

Co-author, Planning and Community Development: A Guide for the 21st Century

Author, Historic Preservation: An Introduction to Its History, Principles, and Practice

Awards and Recognition:

Eastern Michigan University Teaching Excellence Award, 2005.

Innovative Excellence in Teaching, Learning, and Technology Award at the Ninth International Conference on College Teaching, Learning, and Technology, 1998.

Alpha Rho Chi medal for student leadership, 1970.

Book Author: Dr. Tyler is principal author of books relating to community planning and historic preservation.

Planning and Community Development: A Guide for the 21st Century (with co-author Robert M. Ward; W.W. Norton and Company, 2011). This book presents a comprehensive description of community planning, with topics developed around the framework of the comprehensive plan. Its primary audiences are planning practitioners, lay planners, students, and community activists. Extensive online resources were created to complement the text (<http://cityhallcommons.com>).

"This book is meant to introduce students and laypersons to community planning. It does this very well." (CHOICE)

"Impressively thorough." (Book News)

"This is the textbook I wish my professor had used when I signed up for the Intro course in college." (Amazon.com review)

Historic Preservation: An Introduction to Its History, Principles, and Practice (W.W. Norton and Company, 2000 and 2009; 2009 edition with co-authors Ted J. Ligibel and Ilene R. Tyler, FAIA, FAPT): This successful book remains a popular introductory text on this topic and has been adopted as a primary textbook by historic preservation programs across the country.

"An essential resource." (PreservationDirectory.com)

"Used by a majority of preservation programs across the country." (Ted Ligibel, Chair, National Council of Preservation Educators)

"If we could have only one book on the practice of historic preservation, this may well be that book." (Alabama Trust for Historic Preservation)

"One of the top-selling titles on our list, this book has become established as the basic text on historic preservation." (Nancy Green, Senior Editor, W.W. Norton and Company)

Dr. Tyler developed and wrote software for a web-based textbook on **Downtown Revitalization Planning**, consisting of approximately 200 web pages. (2001) (See: cityhallcommons.com/topiclist.html).

Books currently in draft form:

History of Transportation Systems in the United States

The Day the Column Fell: Unlocking the history of the Judge Robert S. Wilson House

12 May 2004

Mergers and Acquisitions

By Robert M. Ward and Norman Tyler, 2002

American cities have long had a history of mergers and acquisitions. The 1990s saw a particularly high level of activity, with many cities merging to form larger entities. This was done for a variety of reasons, including the desire to improve services, reduce costs, and increase efficiency. However, the process was not without controversy. Many people were concerned about the loss of local identity and the potential for increased bureaucracy. Despite these concerns, the number of mergers continued to rise, and many cities have successfully integrated their resources and improved their services. This article explores the reasons behind these mergers and the challenges they have faced. It also discusses the impact of these mergers on the communities involved and the future of urban consolidation in America.

The four most important words in planning

By Norman Tyler, AICP

It has been said that the three most important words in the English language are "I love you." It's difficult to argue with this proposition. For more love in the world could certainly make it a better place. In a similar vein, this article makes a case for what may be the four most

important words in urban planning. As hold as it may first seem, this four word phrase could represent the most meaningful shift toward improving our

Transportation systems have had a major impact on our cities. In many American cities, more than 50 to 60 percent of the land area is given over to transportation through roads and parking areas. In Detroit, for example, a city that has been eroded of center city residents by the convenience of its downtown freeway system, there are 13 parking spaces for every resident.

communities, and even our lifestyles, since World War II. First, an introduction to set the stage for this assertion.

In American society we live with an enduring legacy of our sense of self-worth being closely linked to our passion for mobility. It is not difficult to chart how transportation systems have affected the size of the "chart" may be surprising. Its general impact has been more than significant; it has been incredible.

It is not hyperbole to conclude the growth of the United States has been led by the development of its transportation technologies. The settlement of the New World by the Spanish explorers, the French traders, and British settlers was all based on new navigational skills of the Europeans in the 16th century. Development of the "Northwest Territories" in Ohio and beyond was initiated with the building of the National Road, the first reliable route to cross the Appalachians. The Erie Canal provided a dependable water route through a split in the mountains

DOWNTOWN ANN ARBOR DESIGN GUIDELINES

Adopted February 7, 2011

*Member, Mayor's Task Force:
Ann Arbor Design Guidelines*

Author of print-on-demand book, Issues of Historic Preservation

First online course at EMU: In 1998, Norman developed the first online class taught at Eastern Michigan University. "Issues of Historic Preservation," which included students from across the United States, was developed "from scratch" without the aid of proprietary software packages now available; its primary resource was an online version of his book, *Issues of Historic Preservation* (1994).

Research:

Dr. Tyler's research throughout his career has focused on the development of new approaches to community planning and the review and assessment of downtown revitalization efforts. He has written two doctoral dissertations on these topics. This research directly informs his teaching; he has developed an extensive online simulation exercise (The Rivertown Simulation) dealing with issues of community planning which is used in a number of planning courses at EMU and which is linked to exercises in his book, *Planning and Community Development*. Other research has explored preservation planning and the comprehensive plan, the integration of historic theaters and downtown planning, the Main Street Program, and development of an energy-efficient new town in Pennsylvania. He has been the designer of innovative housing prototypes; these include numerous solar and earth-sheltered residences and housing for a flood-prone community in West Virginia. He also co-developed an online set of planning applications for use of local governments—the WebPolis Consortium Project, funded through the U.S. Department of Commerce.

Educational innovations

Norm has been an enthusiastic advocate for the use of new technology to facilitate student learning. This is evidenced in a number of significant and innovative projects.

Home page of Rivertown Simulation

Rivertown Simulation: Since 1988 he has worked on the development of Rivertown Simulation, an extended interactive planning exercise in downtown revitalization that has been used in planning courses in this and other countries. The simulation is an integral element of his new book, *Planning and Community Development*, including an online component to tie directly to topics in the text.

(See: cityhallcommons.com/rivertownintropage.html)

"Dr. Tyler's myriad experiences in similar communities allowed him to create a simulation of municipal government and civic life that was both emotionally captivating for the participants and eerily accurate, as several of my subsequent professional experiences have proven." (Adam Cook, former student)

WebPolis Consortium: Between 2003 and 2005 Norm served as the co-principal investigator for the WebPolis Consortium project, supported with a grant from the U.S. Department of Commerce under its Technologies Opportunities Program (\$241,000) and a Research Excellence Fund grant from Eastern Michigan University (\$43,200).

Proprietary software was developed for local governments that could be shared through the Internet. Applications include discussion forums, decision-support systems, financial analysis, online GIS, property infill analysis, local economic development tools, and other interactive programs. The purposes of the project were numerous, including providing online resources to local governments and their residents, bringing leading edge technologies at minimal cost, sharing resources between communities, and creating partnerships for local funding. The project was tested in demonstration communities and utilized as an educational tool in planning courses. An external evaluation of the project indicated it was "a tool that has been tailored to users' needs both in its usability and effectiveness." It is currently being reformatted as WebPolis2 for a new server with software updates. (See: cityhallcommons.com)

WebPolis Consortium: online applications for local governments

"Dr. Tyler has established himself as a pioneer in applying information technology and geospatial technology in decision-making for community development and redevelopment." (Dr. Yichun Xie, Director of the Institute for Geospatial Research and Education, Eastern Michigan University)

Plan-A-City board

Plan-A-City: Norman was a primary designer of Plan-A-City, an interactive exercise for elementary and secondary classrooms in which students work in collaborative groups to design a city on undeveloped land. A large board accommodates magnetic pieces representing various land uses, including industry, commercial, residential, and infrastructure. The prototype was first presented at a national conference of the American Institute of Architects. (See: tylertopics.com/planacity.jpg)

"Norman's leadership in the game's development was instrumental in ensuring that the game instills the values of good urban design principles in a fun and engaging experience for our youth." (Gene Hopkins, FAIA, former president, American Institute of Architects)

Professional and Service Organizations:

Local and state organizations: Dr. Tyler has been involved on the boards and on numerous committees with state and local professional organizations. He has served in a variety of capacities, drawing on his expertise both as an educator and as a former practitioner. The involvements include:

Students and alumni at Michigan Association of Planning annual conference

Michigan Association of Planning (formerly Michigan Chapter, American Planning Association): Norman has been a supporter of the state organization, one of the largest in the country, for over 20 years. He has served on its board and as a member of the following committees:

- Publications committee;
- Education committee;
- Annual conference committee;
- Faculty advisor for planning student conferences;
- Faculty liaison;
- Chapter elections nominating committee;
- Joint Merger Committee (merging MAPA with Michigan Society of Planning Officials);
- Initial webmaster for organization's web site;

Faculty Advisor: State planning chapter annual student conference

He also has contributed numerous presentations to its annual conference, articles to its magazine, and has been an instructor for its AICP training sessions.

Michigan Historic Preservation Network: Norman has been active for many years with this large statewide organization, having served as board member and member of various committees, including the annual conference committee, education committee, awards committee.

Ann Arbor Preservation Alliance: He is a founding member of the Preservation Alliance, serving as chair of its education committee. (See: aastreetts.aadl.org/)

Other public service activities:

Mayor's Task Force on Ann Arbor Downtown Design Guidelines: Norman served as a key member of the group that wrote the first design guidelines for the community's downtown districts.

(See: www.a2gov.org/a2d2/designguidelines/Pages/DesignGuidelines.aspx)

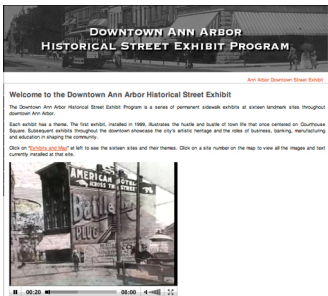

Ann Arbor Historic Street Exhibit Program: Founding board member and chair of its design charrette.

Ann Arbor Historic District Commission: He served for six years as a member of the HDC and was its chair during that time. While a member, he produced a state-funded 90-minute educational video on historic styles in Michigan, regularly shown on community television.

East Michigan Avenue Corridor Economic Development Study: Co-principal investigator: 1993.

Historic survey of Cherry Hill, Michigan, 1988.

Historic survey of downtown Dundee, Michigan and preparation of proposal for historic district, 1986.

Design Chair: Ann Arbor Street Exhibits Program

Selected Non-academic Professional Activities:

Private practice: Prior to his academic career, Norm was involved as a planner/architect in many community planning projects. Selected projects include:

Town Planner: Aerial photo of New Village under construction

New Village, Pennsylvania (1981-83): Served as planner and designer for development of a new town proposal near Uniontown, Pennsylvania. Known originally as New Village, the innovative community was planned, developed, and built by its future residents under the direction of the Rensselaerville Institute of New York and with funding from various federal agencies. Structures utilized very-high-R insulation panels to reduce energy costs significantly. Norman's role was to educate the future residents on planning and design principles to allow them to make their own decisions on selection of a 200-acre site and development of a site plan for their community. He also served as the project's site planning consultant and monitored its early development. (See: tylertopics.com/NewVillage.pdf)

Main Street Program (1982): One of the first demonstration cities in the National Main Street Program was Uniontown, Pennsylvania. Norman's firm (Tyler & Tyler Architects/Planners) was hired as planner/historian for this project, which included researching the downtown's history, conducting a community design charrette, and using this information to prepare its downtown revitalization plan.

"Norm was the first individual to really point out the historic wealth of the community's built environment and his work and vision from over 25 years ago is still referred to today." (Lynda Waggoner, Vice President, Western Pennsylvania Conservancy)

Redevelopment Authority of the County of Fayette, Pennsylvania (1978-1983): For five years Norman was the professional consultant to this western Pennsylvania redevelopment authority. His activity focused on redevelopment projects in small former coal-mining communities, where coal-company-owned housing was being purchased and rehabilitated for owner occupancy, using federal and state funding sources.

"Norm Tyler served a specially important part in revitalizing areas of the County." (Jean Sickel, former Deputy Director, Redevelopment Authority of the County of Fayette, Pennsylvania)

On cover of book on Peace Corps

Consultant for prototype housing and site planning, Williamson, West Virginia (1979): Williamson had suffered from repeated devastation from flooding. Norman directed construction of a demonstration housing unit he designed for steep slopes, utilizing a Clivus Multrum waste system.

Peace Corps and VISTA volunteer: Early in his career Norman served as a community development volunteer in the U.S. and overseas. This volunteer work influenced his future career decisions.

He served as a Peace Corps volunteer for two years in Sierra Leone, West Africa (1964 to 1966). He coordinated a post-colonial development program in Kenema Province, including the development and construction of three village schools, a health center, a new cattle scale for micro-scale economic development, and a community water supply system. He also supervised a rural development training program to carry the program forward. (He is shown on the cover of a book written about the Peace Corps.)

As a VISTA community development volunteer in Baltimore

As a VISTA volunteer in the City of Baltimore, Norman and his wife, Ilene, staffed the Neighborhood Design Center (NDC), an advocacy office coordinating volunteer participation of planning and architect practitioners in underserved neighborhoods. NDC grew rapidly in its initial years (1970 to 1972) and he was actively involved in community outreach efforts and the organization's coordination with work of the Baltimore City Planning Department. The organization still provides volunteer professional expertise to local communities in need, and although living in a distant state, Norm retains his membership with the organization.

Norman was a recruiter for the Peace Corps and VISTA programs from 1972 to 1973. He visited university campuses throughout the Midwest, giving presentations and speaking individually with interested students. He also served as a Peace Corps trainer for a rural development program in Sierra Leone.

Early Public Projects

1988: Oberlin College Humanities Youth Project: national residency program in Planning/Architecture for high school students

1983: Documentation of the Hagan House, Chalk Hill, Pennsylvania, Frank Lloyd Wright, Architect.

1982-1983: Board of Directors: Fayette-Westmoreland Counties, Pennsylvania, Historical Society

1976: President, Uniontown Art Club, Uniontown, Pennsylvania.

1975: Planner/Architecture, Masontown Public Housing Project, Masontown, Pennsylvania

1975: Housing Task Force, Uniontown, Pennsylvania.

1974 – 1975: Speaker for Laurel Highlands ALERT, Fayette County, Pennsylvania (organization opposed to construction of a nuclear power facility).

Planner and architect for public housing project, Masontown, Pennsylvania

Other Personal Accomplishments

1991: Climbed Mt. Kilimanjaro, Tanzania, West Africa.

1975–1983: Hand-built his own house/workshop/office complex.

Travel:

Most of the United States and Canada

England, France, Italy, Germany, Spain, Greece, Switzerland

Ecuador, Costa Rica

Sierra Leone, Ghana, Nigeria, Cameroon, West Africa

Climbing Mt. Kilimanjaro

"As a fellow academic, long retired, I believe that it is high time that Norm Tyler's stature among planning teachers, researchers, and community leaders be recognized by his election to Fellow of the American Institute of Certified Planners." (Carl Goldschmidt, FAICP, emeritus faculty, Michigan State University)
